GOULD & CUTLER CORPORATION

BOSTON, MASS.

MOORE'S HOUSE PAINT

The most durable combination of high-grade paint pigments and pure linseed oil, properly proportioned; ground exceedingly fine and mixed with turpentine and Japan Dryers. For exterior use it excels in covering and spread-properties, and the wearing qualities are guaranteed and can be depended upon to give entire satisfaction when applied according to directions under proper conditions.

One gallon covers about 350 square feet, two coats.

	1 Gal. Per Gal.	½ Gal. Each	¼ Gal. Each	⅛ Gal. Each	⅙ Gal. Each

NOVEMBER 1, 1929

MOORE'S CEMENT COATING

An exterior or interior paint for cement, concrete, stucco or brick walls. Has been successfully used on damp surfaces underground. Prevents cement or stucco from disintegrating and cracking due to the action of the elements. Dries with a velvet flat finish.

TWELVE COLORS AND WHITE

1 Gallon

\$3.80

$\frac{1}{4}$ Gallon
Each
\$1.05

White stocked in 5-Gallon Cans.

DECORATORS' OUTSIDE WHITE

A semi-paste paint intended for exterior use. Made especially for painters. As it is a semi-paste product it mixes more readily than lead and oil. It is made of lead, zinc, and other good covering pigments. This enables the painter to secure a good job in two coats where three coats would be necessary with other products.

PAINTERS' GLOSS ENAMEL

Made especially for painters' use, easy brushing, free flowing white enamel.

Will not sag or run, flowing to a nice even film, with a high gloss finish. Dries overnight.

White Gallon Cans Only.....\$4.00

DULAMEL

Dulamel is a processed oil enamel for interior use on large or small surfaces; it works easily, dries overnight, and is permanent in color and degree of gloss, which, while lacking in the objectionable reflective glare of a high gloss enamel, still retains the desirable cleansing qualities of enamel, as it may be washed and rewashed without injury.

Dulamel is manufactured in Pure White and eight practical and beautiful tints. It may be successfully applied to any surface, if directions are followed, and will be found to be economical, beautiful and durable.

1 Gallon

UTILAC ENAMEL

Utilac is a quick-drying finishing Enamel, drying in four hours or less, so that two coats can be applied in one working day. Its working qualities are similar to higher priced Enamels in that it flows and levels to a smooth, hard, semi-gloss surface, spreading and covering perfectly. It may be used on large plaster surfaces, wallboard, wall trim, furniture, etc., also for household decorations.

Benjamin Moore & Company conceived and developed the idea of manufacturing an enamel to dry in a short space of time, one

that would have all the advantages and none of the disadvantages of lacquer.

Utilac also may be used on floors, both wood and concrete, and is less affected by dampness in cement than any other Paint. It is made in 16 standard colors, also black and white, any of which can be intermixed.

MOORE'S MURESCO (HOT WATER)

Muresco is unquestionably the best selling and most popular wall finish in the markets of the world. This fact is due to the ease of preparation and application and that combination of peculiar richness and depth of color so characteristic of this product. Muresco is a dry powder prepared for use by mixing with boiling water, as boiling water is the only solvent of the highest grade of hide stock glue, which is used solely in Muresco and recognized as the most important factor of a water paint. The added facts that it is perfectly sanitary and highly economical have also tended to make Muresco the leading Wall Finish. Muresco is exceptionally durable for a finish of this character, presenting a surface which will not crack, chip, or peel and will not rub off. Made in white, eighteen tints and ten deep colors. One pound Muresco covers, on smooth surfaces, fifty to seventy-five square feet.

MOORE'S SHIP COPPER PAINT

The new Copper Paints are formulated on the results of recent research on marine paints. Their action is the result of two different principles: Firstly, they contain all the necessary poisonous materials to kill off barnacles and marine growth; and secondly, the surface of the paint is being continually loosened so that any adhering material quickly loses its hold and falls off. This combination keeps the ship's bottom always in a clean condition.

IMPERVO VARNISHES

"QUALITY FOREVER—MOORE"

EXTERIOR SPAR

This is the old-fashioned hard gum, long oil type, which made the term "Spar Varnish" famous.

As indicated by its name, it is an Exterior Varnish, not a "Waterproof" Varnish. Continued immersion in water will cause it to appear slightly smoky, but it will dry out unharmed and as clear and brilliant as before.

This varnish is very elastic and will not show white marks from knocks or scratches. It will not crack from the expansion and contraction of sudden temperature changes.

Dries dust-free in four hours, dry to handle overnight. Hardens in two days. Should not be used indoors; use it anywhere outdoors with the expectation of maximum life.

1 Gallon	$\frac{1}{2}$ Gallon	$\frac{1}{4}$ Gallon	$\frac{1}{8}$ Gallon	$\frac{1}{16}$ Gallon
\$5.00	\$2.68	\$1.43	\$.81	\$.49

EXTERIOR WHITE SPAR

\$6.00	\$3.19	\$1.70	\$.95	\$.55
--------	--------	--------	--------	--------

PALE RUBBING AND POLISHING

This varnish is made expressly for the finest interior finish and cabinet work, that is to be rubbed and polished. It is made from choice selected material, is pale in color, flows and levels perfectly.

It dries dust-free in three hours and may be rubbed in thirty-six. It will polish in three or four days after rubbing.

\$5.25	\$2.80	\$1.49	\$.84	\$.51
--------	--------	--------	--------	--------

DRI-DUL

Dri-Dul is a first-class full-bodied interior varnish, which dries with a beautiful, uniformly dull finish, similar to a rubbed surface. It is pale in color, waterproof, and will not show white scratches. It may be applied over bare wood, but gives best results when the surface is built up as for a gloss varnish and Dri-Dul applied as the finish. Not for use on floors.

Dries dust-free in three hours and can be handled overnight, but takes about three days to harden through.

\$3.50	\$1.93	\$1.05	\$.62	\$.40
--------	--------	--------	--------	--------

IMPERVO VARNISHES

(Continued)

MOVAR

This is a universal or general-purpose varnish. In other words, its various properties and characteristics are so balanced that it will give satisfactory results in any service in which varnish may be used.

It is waterproof, elastic, and dries with a brilliant lustre. It is not ruined by accidental wetting with perfumery (alcohol) smelling salts (ammonia) or other every-day chemicals. It may be washed with soap and water, and will not soften with heat of the body when used on furniture. If a dull finish is desired, it may be rubbed with pumice and water in three days. It is so tough and elastic that it will not scratch white and is durable outdoors.

Movar is a pale, easy-working varnish which dries dust-free in four hours and hard in ten. It does not skin in the sun.

MARINE SPAR

Marine Spar is for use on boats or any location exposed to similar conditions. It combines great water resistance with extreme durability. When dry it forms a film which is to all practical purposes impervious to water, oils or grease. This film is highly elastic and will give and stretch more than anything it covers, so that the rack and stretch of boats in a seaway will not make it crack.

Marine Spar will not turn white either from water, knocks, or scratches; it will not soften up or get sticky in hot muggy weather, and it will not lose its lustre under constant exposure to the direct rays of the sun.

It is pale in color, dries dust-free in five hours; can be handled in ten or twelve, and hardens in two days.

Use it anywhere that a varnish is exposed to the weather and liable to be submerged or drenched at intervals.

MOORE'S 4T5 VARNISHES

4T5 FLOOR VARNISH

4T5 Floor is a medium-priced varnish that gives superior satisfaction for the money expended. For best work we recommend our Elastic Floor, but 4T5 may be confidently relied upon to give satisfaction for all ordinary work. For a varnish of this class, it is exceptionally elastic and tough. It will not scratch white and may be washed with soap and water without injury.

Dust-free in four and a half hours and dries in eight. May be walked upon in fifteen hours.

4T5 FLOOR

1 Gallon	$\frac{1}{2}$ Gallon	$\frac{1}{4}$ Gallon	$\frac{1}{8}$ Gallon	$\frac{1}{16}$ Gallon
\$3.25	\$1.80	\$.99	\$.59	\$.38

4T5 INTERIOR FINISH OR 4T5 INSIDE SPAR

A companion varnish to 4T5 Floor, possessing all the excellent qualities of the floor, but modified slightly for use on standing work and trim.

\$3.25	\$1.80	\$.99	\$.59	\$.38
--------	--------	--------	--------	--------

MOORE'S 6 X 7 FLOOR AND TRIM

A moderate-priced varnish, which gives remarkable service for the price paid.

Dust-free in four hours and dry in eight. Hardens overnight.

\$2.50	\$1.43	\$.80	\$.49	\$.34
--------	--------	--------	--------	--------

UTILAC VARNISH

A four-hour varnish with the qualities, durability and appearance of a high-grade floor varnish. Clear in color, tough and waterproof, and is suitable for floors, trim or other surfaces.

\$4.50	\$2.43	\$1.30	—	—

MOORE'S SPECIAL VARNISHES

LIGHT HARD OIL FINISH

A medium grade, suitable for ordinary work. Dries in eight hours with a good gloss. Can be rubbed in thirty-six hours, if desired.

1 Gallon	$\frac{1}{2}$ Gallon	$\frac{1}{4}$ Gallon	$\frac{1}{8}$ Gallon	$\frac{1}{16}$ Gallon
\$2.75	\$1.55	\$.86	\$.53	\$.35

NO. 1 COACH

A reliable varnish for ordinary interior use where cheaper goods than Extra Light Coach will answer the purpose. It is medium light in color, dust-free in two and a half hours, and dries with a full lustre in eight hours.

\$2.75	\$1.55	\$.86	\$.53	\$.35
--------	--------	--------	--------	--------

NO. 1 FURNITURE

A pale heavy-bodied varnish for interior use. It is light in color and flows well and dries hard. Will not powder under friction. Dries overnight.

\$2.50	\$1.43	\$.80	\$.49	\$.34
--------	--------	--------	--------	--------

LINOLEUM VARNISH

This varnish is made especially for use on printed linoleums and similar floor coverings. It is extremely pale in color and applied on a clean surface will dry hard overnight. Used on printed linoleum and oil cloth, it will add immeasurably to the wearing qualities of the floor covering and prevent the rapid deterioration of the design.

Linoleum varnish is made to resist the action of strong soaps and alkalies, as well as protect the surface against wear.

\$3.25	\$1.80	\$.99	\$.59	\$.38
--------	--------	--------	--------	--------

BRUSH SECTION

NOVEMBER 1, 1929

OUR MOTTO:

“SERVICE”

GOULD & CUTLER CORPORATION
11-15 STILLINGS STREET BOSTON, MASS.

THE CARE OF BRUSHES

If the following suggestions are carried out, your brushes will do better work and last longer. There are brush users, even painters, who do not take proper care of their brushes. If a little time is given to thoroughly cleaning a brush after using, it will mean longer life for the brush and reduced expense to the user.

A large percentage of claims on defective brushes is because of improper usage, and in that case the loss should not fall upon the manufacturers. Brushes are sent out by the manufacturers in paper wrappers, and should be at all times kept so until used. The reason being that it is essential that they remain in their true shape, and to guard against absorbing moisture, which is detrimental to bristles.

Brushes that have been used in paint or varnish should be thoroughly cleansed with benzine or turpentine; after which the bristles should be washed with soap and water and straightened out with a comb, then carefully wrapped in paper. Be sure that the brush is thoroughly dry before it is put away.

Brushes used in alcohol preparations should be thoroughly cleansed with alcohol immediately after using. Never keep brushes in water, as it is the worst thing that could be done; it not only swells the handle of the brush but is apt to loosen the setting.

Kalsomine and whitewash brushes are harder to take care of than other kinds of brushes, as kalsomine and cold water paints contain more or less alkali, which has a tendency to take the life from the bristles. We might state here that a lime preparation that will burn your hands will destroy your brush. Muresco is harmless on bristles.

To get the best results from kalsomine and whitewash brushes, they should be thoroughly cleansed with water, after which they should be rinsed in a solution two parts water and one part vinegar, thus making neutral any possible alkali. Be sure to thoroughly dry and wrap in heavy paper before putting away.

Soft hair brushes, such as sable, camel's hair, badger and bear, should be cleansed with benzine and an application of vaseline applied before putting away, after which wrap them in paper or cloth.

Brushes that have become hardened and filled with paint or varnish can be saved by using a preparation called "Savabrush." For prices on this article refer to page 39 in this catalogue.

In closing we might say that brushes should never be exposed to the air and sunshine, or put in show windows, as of course this will naturally dry up the bristles. In order to have a perfect brush the bristles should be elastic in order to produce good results.

When making claims for brushes, always send us the brush on which you wish to make the claim so that we may judge whether or not the claim is just. If so, we will return the brush to the manufacturer, who will either repair it or give a new brush in its place.
